

Diego Iván Kippes

Senior Software Engineer | Mercado Libre

Buenos Aires, Argentina | kippes.diego@gmail.com
www.diegokippes.com | LinkedIn | GitHub

I enjoy building software that solves concrete problems and can evolve over time. My focus is on Java, distributed systems and code quality.

EXPERIENCE

Mercado Libre | Senior Software Engineer

Checkout ON · Payments | 2021 – Present

- Progressed from Backend Analyst to Semi Senior and Senior, taking responsibility for critical checkout and payment flows.
- Designed and improved DEBIN flows, checkout with KYC and payment result screens, improving approval rates by up to 3%.
- Implemented Mercado Crédito flows and BIN-based campaigns, improving conversion and payment approval by up to 5%.
- Reduced checkout errors by 10% through validation, error handling and architectural migrations, supported by metrics and operational monitoring.

IncluIT | Backend Developer

Naranja X | 2021

- Automated the generation and scheduled submission of billing documents for the transportation sector.

BierClub | Full Stack Developer

E-commerce | 2020 – 2021

- Built an e-commerce application for a craft brewery, from product definition to production deployment.
